## Roland Releases iPad App and Update for V-02HD Multi-Format Video Mixer

—The Roland V-02HD ultra-compact two-input switcher and video production problem solver adds touch interface capabilities with the V-02HD Remote iPad app and Ver.1.10 System Update—

**Los Angeles, CA, March 18, 2019** — Roland is introducing the dedicated V-02HD Remote iPad control app for GUI-based operation. With system software Ver.1.10 and above, V-02HD Remote turns an iPad into a gorgeous touch interface for the V-02HD. The V-02HD Remote iPad app allows switching function operation, virtual fader audio mixing and quick access to settings and effects parameters. Up to eight custom scenes can be created for fast setup change using preset memories. Roland has also released the Ver.1.10 system update for the versatile and powerful Roland Pro V-02HD Multi-Format Video Mixer. With the Ver.1.10 update, the V-02HD now supports additional resolution and frame rate formats, offers USB MIDI support, and adds increased audio delay and transformer switching.

For iPad remote control operation, the V-02HD's USB Type-B connector can be used to connect directly to iPad lightning ports via commercially available adaptor cables or via Apple's USB Camera adapter, and USB Type-C ports on iPad Pros can be connected with commercially available USB Type-B to Type-C adaptor cables.

The V-02HD video production problem-solver combines a simple switcher, high-quality scaler, input expander, inline video effects/composition and audio solution in one portable unit. This ultra-compact "micro-switcher," designed for solving challenges in livestreaming and video production workflows, fits into most equipment cases and camera bags, making it easy to have on hand for every production, and it also conveniently attaches to standard video mounts and tripods. The V-02HD Multi-Format Video Mixer also facilitates multi-camera, single operator productions.

The V-02HD Ver.1.10 System Update and the Utility software is available for download at https://proav.roland.com/global/products/v-02hd/downloads/.

For additional operational and interface detail, the V-02HD Remote Manual is available for download at https://proav.roland.com/global/products/v-02hd/support/.

The V-02HD Remote app can be downloaded for free from the iTunes App store: https://itunes.apple.com/us/app/v-02hd-remote/id1448016254
