Roland Professional A/V Division Holds Two-Day Training Event at CenterStaging Rehearsal Studio in Burbank, CA

Los Angeles, CA, June 8, 2015 — Roland's Professional A/V division recently held a two-day training event for the new M-5000 Live Digital Mixing Console at CenterStaging rehearsal studio in Burbank, California. The hands-on training was designed to equip Roland's independent U.S. sales network, along with Pro A/V sales teams from Latin America and Canada, with in-depth knowledge of the M-5000's design and operation to support end users in the field. CenterStaging pro audio staff members participated in the M-5000 hands-on training in preparing for M-5000 placements at the rehearsal facility.

A portion of the training also covered video system design, featuring the Roland V-1200HD and integration with the Roland M-5000. Additionally, Roland provided training on the recently released version 2.0 software update for the Roland XS Series AV Matrix rack mount switchers. The updated software features uninterrupted output mode switching, cross dissolve switching, PGM/PST operation mode, enhanced customization Picture-in-Picture capabilities and a new customizable iPad app for wireless touch control.

Roland will be demonstrating these new products later this month at the InfoComm Show in Orlando, Booth #853.
