Roland Professional and Audinate® Holding Webinar

Learn about how Dante™ connectivity can streamline live, streaming, broadcast and recording applications at webinar event on March 23, 2017

Los Angeles, CA, March 13, 2017 — Roland Professional A/V and Audinate®, the creator of the Dante™ networking protocol, are holding a webinar event on March 23, 2017, at 11:00 a.m. PDT.

Join Brad Price of Audinate and Rob Read and Brian Belcher from Roland to learn how integrating Dante audio into your video and audio workflows can streamline live, streaming, broadcast and recording applications.

The Roland XI-Dante expansion card works both in the Roland M-5000 OHRCA Digital Mixing Console series and Roland's new V-1200HD 2 M/E Video switcher. The webinar will demonstrate how to patch Dante audio to and from the V-1200HD, and how Roland's open architecture using the XI-Dante Expansion Card provides seamless Dante audio I/O for the M-5000 series, including the M-48 personal mixing system.
