Roland Professional A/V Displays V-1200HD Multi-Format Video Switcher

INFOCOMM, LAS VEGAS, NV, June 8, 2016 — Roland Pro A/V (booth C10536) is exhibiting its V-1200HD Multi-Format Video Switcher, a Hybrid 2 M/E switcher that combines the features of a production switcher with the power of a presentation switcher.

Users can switch and control functions on the Roland V-1200HD using the dedicated V-1200HDR Control Surface or free downloadable Remote Control Software (RCS). Users can also connect up to two compatible control devices on a network to separate out switcher functions by M/E's, keying, or audio mixing.

Multiple M/E configurations can be selected from 1 M/E to 1.5 M/E and 2 M/E to meet the needs of any live production. Inputs include 10x 3G-SDI and 4x HDMI with 6x 3G-SDI Outputs and 2x HDMI outputs. Scalers on HDMI inputs 3 & 4 and HDMI outputs support SD through HD resolutions.

The V-1200HD has a powerful built-in 16-channel audio mixer that can be expanded via Roland's XI-Expansion cards. An intuitive user interface with assignable cross-points and on-screen names ensures maximum flexibility for live production or broadcast.
